FEATURE ISSUE ON DIGITAL HOLOGRAPHY AND 3D IMAGING

2016 Joint <i>Applied Optics</i> and <i>Chinese Optics Letters</i> Feature Introduction: Digital Holography and 3D Imaging	<i>Ting-Chung Poon, Changhe Zhou, Partha Banerjee, Hoonjong Kang, and Pascal Picart</i>	010001
Uncertainty, certainty, and relativity (Invited Paper)	<i>Francis T. S. Yu</i>	010002
Progress on waveguide-based holographic video (Invited Paper)	<i>S. McLaughlin, C. Leach, S. Gneiting, V. M. Bove, Jr., S. Jolly, and D. E. Smalley</i>	010003
Generation and optical display of a binary-sampled phase-only hologram	<i>P. W. M. Tsang, Y.-T. Chow, T.-C. Poon, and J.-P. Liu</i>	010004
Time-division multiplexing holographic display using angular-spectrum layer-oriented method (Invited Paper)	<i>Yan Zhao, Liangcai Cao, Hao Zhang, Wei Tan, Shenghan Wu, Zheng Wang, Qiang Yang, and Guofan Jin</i>	010005
Anisotropic edge enhancement in optical scanning holography with spiral phase filtering	<i>Kelly K. Dobson, Wei Jia, and Ting-Chung Poon</i>	010006
Demonstration of full-parallax three-dimensional holographic display on commercial 4 K flat-panel displayer	<i>Frank C. Fan, Sam Choi, and C. C. Jiang</i>	010007
Dual-wavelength digital holographic phase reconstruction based on a polarization-multiplexing configuration	<i>Zhe Wang, Yifei Chen, and Zhuqing Jiang</i>	010008
Polarization conversions of diffractive wave plates based on orthogonal circular-polarization holography	<i>Peng Cai, Jianhao Wang, Changshun Wang, Pengfei Zeng, and Hongjing Li</i>	010009
Novel 3D shape measurement method with lower occlusion for the bottom of cavity	<i>Qingyang Wu, Baichun Zhang, Haixin Lin, Xiangjun Zeng, and Zeng Zeng</i>	010010

REGULAR PAPERS

Fiber optics and optical communications

Field-programmable gate array-based large-capacity sensing network with 1642 ultra-weak fiber Bragg gratings	<i>Zhi Wang, Hongqiao Wen, Chenyuan Hu, Wei Bai, and Yutang Dai</i>	010601
--	---	--------

Contents continued

Lasers and laser optics

850 nm centered wavelength-swept laser based on a wavelength selection galvo filter	<i>Muhammad Faizan Shirazi, Mansik Jeon, and Jeehyun Kim</i>	011401
Watt-level output rectangular-core neodymium-doped silicate glass fiber laser	<i>Wentao Li, Danping Chen, Qinling Zhou, and Lili Hu</i>	011402
Observation of antiphase dynamics and harmonic resonance in a modulated dual-wavelength laser	<i>Huibin Chen, Ge Zhang, Wenbin Liao, Bingxuan Li, Xiaolei Wang, and Zhenqiang Chen</i>	011403
Grating-assisted fabrication of sub-wavelength ripples during femtosecond laser processing of dielectrics	<i>Yanping Yuan and Jimin Chen</i>	011404
Optically trapping Rayleigh particles by using focused partially coherent multi-rotating elliptical Gaussian beams	<i>Xi Peng, Chidao Chen, Bo Chen, Yulian Peng, Meiling Zhou, Xiangbo Yang, and Dongmei Deng</i>	011405
1.5 μm dual-lateral-mode distributed Bragg reflector laser for terahertz excitation	<i>Lingeng Zhang, Liqiang Yu, Biwei Pan, Dan Lu, Jiaoqing Pan, and Lingjuan Zhao</i>	011406
High-power continuous-wave and high-energy Q-switched miniature $\text{Yb:Y}_3\text{Ga}_5\text{O}_{12}$ crystal lasers	<i>Wenjuan Han, Lisha Wang, Xiaowen Chen, Linhua Xia, Haohai Yu, Huaijin Zhang, and Junhai Liu</i>	011407

Materials

Tailoring magnetic and electric resonances with dielectric nanocubes for broadband and high-efficiency unidirectional scattering	<i>Yong Wang, Xianghao Zeng, Erchan Yang, Yonghua Lu, Douguo Zhang, and Pei Wang</i>	011601
--	--	--------

Nonlinear optics

Low threshold Raman effect in high power narrowband fiber amplifier	<i>Man Hu, Weiwei Ke, Yifeng Yang, Min Lei, Kai Liu, Xiaolong Chen, Chun Zhao, Yunfeng Qi, Bing He, Xiaojun Wang, and Jun Zhou</i>	011901
---	--	--------

Optical devices

Electro-optic effects induced by the built-in electric field in a {001}-cut silicon crystal	<i>Qi Wang, Zhang Hai, Nian Liu, Baijun Zhao, Xiuhuan Liu, Lixin Hou, Yanjun Gao, Gang Jia, and Zhanguo Chen</i>	012301
---	--	--------

Thin films

Near-infrared lateral photovoltaic effect of epitaxial $\text{LaTiO}_{3+\delta}$ films under high pressure	<i>Jianfeng Xi, Kun Zhao, Hao Ni, Wenfeng Xiang, and Lizhi Xiao</i>	013101
--	---	--------
