## Diffraction and gratings

- Near-field holography enhanced with antireflection coatings—an improved method for fabricating diffraction gratings  
*Yuanfang Li, Huoyao Chen, Stefanie Kroker, Thomas Käsebier, Zhengkun Liu, Keqiang Qiu, Ying Liu, Ernst-Bernhard Kley, Xiangdong Xu, Yilin Hong, and Shaojun Fu* 090501

## Fiber optics and optical communications

- Non-linear polarization orthogonality loss in a semiconductor optical amplifier  
*Wei Zhang, Zhengyong Li, Haiyang Wang, Xiangkong Zhan, Zhongbo Song, and Chongqing Wu* 090601
- Indoor imaging visible light positioning with sampled sparse light source and mobile device  
*Heqing Huang, Lihui Feng, Guoqiang Ni, and Aiyi Yang* 090602
- Simultaneous optical signal to noise ratio and symbol rate estimation with blind chromatic dispersion compensation for auxiliary amplitude modulation optical signals  
*Junyu Wei, Jiangyi Qin, Zhiping Huang, and Xiaojun Guo* 090603
- Adaptive modulation system for liquid crystal phase modulator  
*Bin Zhang, Shiyu Liu, Xianzhu Tang, and Jian'gang Lu* 090604

## Image processing

- Development of image invariant moments—a short overview  
*Kejia Wang, Ziliang Ping, and Yunlong Sheng* 091001

## Instrumentation, measurement, and metrology

- Programmable super-resolution pupil phase filter with a deformable mirror  
*Lina Zhao, Yun Dai, Junlei Zhao, Fei Xiao, Xiaojun Zhang, Xiaojun Zhou, and Yudong Zhang* 091201

## Lasers and laser optics

- Actively  $Q$ -switched ring Tm-doped fiber laser with free space structure  
*Wei Liu, Youlun Ju, Tongyu Dai, Liwei Xu, Jinhe Yuan, Chao Yang, Baoquan Yao, and Xiaoming Duan* 091401
- Hybrid adaptive optics system for a solid-state zigzag master oscillator power amplifier laser system  
*Boheng Lai, Lizhi Dong, Shanqiu Chen, Guomao Tang, Wenjin Liu, Shuai Wang, Xing He, Kangjian Yang, Ping Yang, Bing Xu, Chao Wang, Xianda Liu, Qingsheng Pang, and Yang Liu* 091402

Contents continued

Titanium dioxide-based $Q$ -switched dual wavelength in the 1 micron region	<i>H. Ahmad, M. A. M. Salim, Z. A. Ali, M. F. Ismail, K. Thambiratnam, A. A. Latif, N. Nayan, and S. W. Harun</i>	091403
Time delay signature concealment of chaotic semiconductor laser subject to nonlinear feedback	<i>Chenpeng Xue, Ning Jiang, Yunxin Lv, and Kun Qiu</i>	091404
Tunable femtosecond pulse source from 1.6 to 2.3 $\mu\text{m}$ with 100 kW peak power in an all-fiber system	<i>Peng Wang, Hongxing Shi, Fangzhou Tan, and Pu Wang</i>	091405

## Medical optics and biotechnology

Sparse photoacoustic microscopy based on low-rank matrix approximation	<i>Ting Liu, Mingjian Sun, Naizhang Feng, Minghua Wang, Deying Chen, and Yi Shen</i>	091701
--	--	--------

## Nonlinear optics

Generation of high-energy 284 ps laser pulse without tail modulation by stimulated Brillouin scattering	<i>Zhaohong Liu, Yulei Wang, Yirui Wang, Hang Yuan, Zhenxu Bai, Hongli Wang, Rui Liu, Sensen Li, Hengkang Zhang, Luoxian Zhou, Tan Tan, Weiming He, and Zhiwei Lu</i>	091901
Widely tunable optical parametric oscillator in periodically poled congruently grown lithium tantalite whispering gallery mode resonators	<i>Qijin Mo, Shifeng Li, Yichen Liu, Xudong Jiang, Gang Zhao, Zhenda Xie, Xinjie Lv, and Shining Zhu</i>	091902

## Thin films

Optimization of the spectral performance of an antireflection coating on a micro-spherical substrate	<i>Chun Guo, Mingdong Kong, and Wenyan He</i>	093101
--	---	--------

## Ultrafast optics

Evolution of terahertz waves in air plasma driven by orthogonally polarized two-color pulses	<i>Ya Bai, Jie Tang, Rongjie Xu, and Peng Liu</i>	093201
--	---	--------

## X-ray optics

Full-field x ray nano-imaging system designed and constructed at SSRF	<i>Binggong Feng, Biao Deng, Yuqi Ren, Yudan Wang, Guohao Du, Hai Tan, Yanling Xue, and Tiqiao Xiao</i>	093401
---	---	--------
