Focus Issue on Microwave Photonics

Editorial

Editorial for focus issue on microwave photonics *José Capmany, Jianping Yao, Wei Li, and Shilong Pan* 010001

High-Speed Optoelectronic Devices

Semiconductor lasers for high-speed information technologies (Invited Paper) *Ninghua Zhu* 010002

Sensitivity improvement of broadband electro-optic polymer-based optical phase modulator using 1D and 2D photonic crystal structures *K. Receveur, K. Wei, M. Hadjloum, M. El Gibari, A. De Rossi, H. W. Li, and A. S. Daryoush* 010003

Integrated Microwave Photonics

Subwavelength grating waveguide devices in silicon-on-insulators for integrated microwave photonics (Invited Paper) *Lawrence R. Chen* 010004

DFB laser arrays based on the REC technique and their applications in radio-over-fiber systems (Invited Paper) *Yunshan Zhang, Yu Liu, Jun Lu, Yuechun Shi, Wei Chen, Jilin Zheng, Xiangfei Chen, Jianguo Liu, and Ninghua Zhu* 010005

Single-waveguide-based microresonators for optical sensing *Zhuoran Wang, Lei Guan, Yuren Chen, Li Dong, and Guohui Yuan* 010006

Microwave Photonic Signal Generation and Distribution

Photonic generation of background-free millimeter-wave ultra-wideband signals (Invited Paper) *Wei Li, Ming Li, and Ninghua Zhu* 010007

4×4 multiple-input multiple-output coherent microwave photonic link with optical independent sideband and optical orthogonal modulation (Invited Paper) *Xiang Chen and Jianping Yao* 010008

Frequency synthesis of forced opto-electronic oscillators at the X-band *T. Sun, Li. Zhang, A. K. Poddar, U. L. Rohde, and A. S. Daryoush* 010009

Single-longitudinal-mode, narrow-linewidth oscillation from a high- Q photonic-electronic hybrid cavity *Ziping Zhang, Yitang Dai, Feifei Yin, Pan Ou, Yue Zhou, Jianqiang Li, and Kun Xu* 010010

Contents continued

Full-duplex transmission of IEEE 802.11ac-compliant MIMO WLAN signals over a 2-km 7-core fiber	<i>Yuting Fan, Jianqiang Li, Yi Lei, Ming Tang, Feifei Yin, Yitang Dai, and Kun Xu</i>	010011
------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------	--------

Microwave Photonic Processing, Sensing and Measurements

Photonics-assisted compressive sampling system for wideband spectrum sensing (Invited Paper)	<i>Qiang Guo, Minghua Chen, Yunhua Liang, Hongwei Chen, Sigang Yang, and Shihong Xie</i>	010012
----------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------	--------

Performance evaluation of optical beamforming-based wideband antenna array (Invited Paper)	<i>Xingwei Ye, Bowen Zhang, Yamei Zhang, Dan Zhu, and Shilong Pan</i>	010013
--------------------------------------------------------------------------------------------	-----------------------------------------------------------------------	--------

Full-band direct-conversion receiver with enhanced port isolation and I/Q phase balance using microwave photonic I/Q mixer (Invited Paper)	<i>Jianqiang Li, Jia Xiao, Xiaoxiong Song, Yue Zheng, Chunjing Yin, Qiang Lv, Yuting Fan, Feifei Yin, Yitang Dai, and Kun Xu</i>	010014
--------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------	--------

Regular Paper

Fiber optics and optical communications

Investigation of clustering effects on erbium-doped fiber laser performance	<i>Md. Ziaul Amin and Khurram Karim Qureshi</i>	010601
-----------------------------------------------------------------------------	-------------------------------------------------	--------

Imaging systems

Flat mirror for millimeter-wave and terahertz imaging systems using an inexpensive metasurface	<i>Gil Litmanovitch, David Rrotshild, and Amir Abramovich</i>	011101
------------------------------------------------------------------------------------------------	---------------------------------------------------------------	--------

Lasers and laser optics

1 J, 1 Hz lamp-pumped high-gain Nd: phosphate glass laser amplifier	<i>Chao Wang, Hui Wei, Jiangfeng Wang, Dajie Huang, Wei Fan, and Xuechun Li</i>	011401
---------------------------------------------------------------------	---------------------------------------------------------------------------------	--------

Watt-level high-power passively Q-switched laser based on a black phosphorus solution saturable absorber	<i>Xi Wang, Zhenfu Wang, Yonggang Wang, Lu Li, Guowen Yang, and Jinping Li</i>	011402
----------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------	--------

Stable dual-wavelength erbium-doped fiber laser using novel fabricated side-polished arc-shaped fiber with deposited ZnO nanoparticles	<i>H. Ahmad, I. S. Amiri, A. Z. Zulkifli, H. Hassan, R. Safaei, and K. Thambiratnam</i>	011403
----------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------	--------

Beat note analysis and spectral modulation of terahertz quantum cascade lasers with radio frequency injection	<i>Yonghao Zhu, Hua Li, Wenjian Wan, Li Gu, Tao Zhou, Stefano Barbieri, and Juncheng Cao</i>	011404
---------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------	--------

Materials

Pure red visible emission via three-photon excitation of colloidal Na ₃ ZrF ₇ :Er nanoparticles using a telecom-band laser	<i>Shuai Ye, Guangsheng Wang, Maozhen Xiong, Jun Song, Junle Qu, and Weixin Xie</i>	011601
--------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------	--------

Scattering

Static light scattering properties of a ZnO nanosphere aqueous suspension at visible and near-infrared wavelengths	<i>Haopeng Wu, Jiulin Shi, Feng Yan, Junjie Yang, Yubao Zhang, and Xingdao He</i>	012901
--------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------	--------
