

PHOTONICS Research

Volume 2
Number 1
February 2014

Characterization of high nonlinearity in Brillouin amplification in optical fibers with applications in fiber sensing and photonic logic	<i>Daisy Williams, Xiaoyi Bao, and Liang Chen</i>	1
Spectral properties of Au–ZnTe plasmonic nanorods	<i>H. Alisafaee, J. Marmon, and M. A. Fiddy</i>	10
Attribution of Fano resonant features to plasmonic particle size, lattice constant, and dielectric wavenumber in square nanoparticle lattices	<i>Drew DeJarnette, Justin Norman, and D. Keith Roper</i>	15
Theoretical analysis of Bloch mode propagation in an integrated chain of gold nanowires	<i>Ricardo Tellez-Limon, Mickael Fevrier, Aniello Apuzzo, Rafael Salas-Montiel, and Sylvain Blaize</i>	24
Volume integral method for investigation of plasmonic nanowaveguide structures and photonic crystals	<i>A. M. Lerer, I. V. Donets, G. A. Kalinchenko, and P. V. Makhno</i>	31
Method for enhancing visibility of hazy images based on polarimetric imaging	<i>Jian Liang, Liyong Ren, Enshi Qu, Bingliang Hu, and Yingli Wang</i>	38
