

PHOTONICS

Research

Volume 3
Number 5
October 2015

Introduction for the Integrated Photonics: Challenges and Perspectives feature	<i>Daoxin Dai, Di Liang, and Liu Liu</i>	IP1
Quantum dot lasers for silicon photonics [Invited]	<i>Alan Y. Liu, Sudharsanan Srinivasan, Justin Norman, Arthur C. Gossard, and John E. Bowers</i>	B1
Silicon and hybrid silicon photonic devices for intra-datacenter applications: state of the art and perspectives [Invited]	<i>Yu Li, Yu Zhang, Lei Zhang, and Andrew W. Poon</i>	B10
Lowering the energy consumption in silicon photonic devices and systems [Invited]	<i>Zhiping Zhou, Bing Yin, Qingzhong Deng, Xinbai Li, and Jishi Cui</i>	B28
Silicon and silicon nitride photonic circuits for spectroscopic sensing on-a-chip [Invited]	<i>Ananth Z. Subramanian, Eva Ryckeboer, Ashim Dhakal, Frédéric Peyskens, Aditya Malik, Bart Kuyken, Haolan Zhao, Shubnath Pathak, Alfonso Ruocco, Andreas De Groote, Pieter Wuytens, Daan Martens, Francois Leo, Weiqiang Xie, Utsav Deepak Dave, Muhammad Muneeb, Pol Van Dorpe, Joris Van Campenhout, Wim Bogaerts, Peter Bienstman, Nicolas Le Thomas, Dries Van Thourhout, Zeger Hens, Gunther Roelkens, and Roel Baets</i>	B47

(Contents continued)

InP photonic circuits using generic integration [Invited]	K. A. Williams, E. A. J. M. Bente, D. Heiss, Y. Jiao, K. Ławniczuk, X. J. M. Leijtens, J. J. G. M. van der Tol, and M. K. Smit	B60
Laser-annealing-made amplified spontaneous emission of “giant” CdSe/CdS core/shell nanocrystals transferred from bulk-like shell to quantum-confined core	Chen Liao, Kai Fan, Ruilin Xu, Huichao Zhang, Changgui Lu, Yiping Cui, and Jiayu Zhang	200
Enhanced optical Kerr nonlinearity of MoS ₂ on silicon waveguides	Linghai Liu, Ke Xu, Xi Wan, Jianbin Xu, Chi Yan Wong, and Hon Ki Tsang	206
Multicolored sideband generation based on cascaded four-wave mixing with the assistance of spectral broadening in multiple thin plates	Peng Wang, Jun Liu, Fangjia Li, Xiong Shen, and Ruxin Li	210
Broadband ultrafast nonlinear optical response of few-layers graphene: toward the mid-infrared regime	Lili Miao, Yaqin Jiang, Shunbin Lu, Bingxin Shi, Chujun Zhao, Han Zhang, and Shuangchun Wen	214
Mode converter based on dual-core all-solid photonic bandgap fiber	YongJun Zhang, Yuan Wang, ShanYong Cai, MingYing Lan, Song Yu, and WanYi Gu	220
Theoretical investigation of core mode cut-off condition for tapered multicore fiber	Xuanfeng Zhou, Zilun Chen, Hang Zhou, and Jing Hou	224
Dynamics of lossless polarization attraction	Matteo Barozzi and Armando Vannucci	229
High-resolution pseudo-inverse ghost imaging	Wenlin Gong	234
Nonorthogonal object identification based on ghost imaging	Xiaofan Gu and Shengmei Zhao	238
Observation of high-Q optomechanical modes in the mounted silica microspheres	Zhen Shen, Zhong-Hao Zhou, Chang-Ling Zou, Fang-Wen Sun, Guo-Ping Guo, Chun-Hua Dong, and Guang-Can Guo	243
73 nJ, 109 fs Yb-doped fiber laser at 19 MHz repetition rate in amplifier similariton regime	Yizhou Liu, Yifan Cui, Jian Zhang, Aimin Wang, and Zhigang Zhang	248
Arbitrary focusing lens by holographic metasurface	Rongzhen Li, Zhongyi Guo, Wei Wang, Jingran Zhang, Keya Zhou, Jianlong Liu, Shiliang Qu, Shutian Liu, and Jun Gao	252
Compact Q-switched 2 μm Tm:GdVO ₄ laser with MoS ₂ absorber	Pingguang Ge, Jie Liu, Shouzhen Jiang, Yuanyuan Xu, and Baoyuan Man	256

Subnanosecond KTiOPO ₄ optical parametric oscillator intracavity pumped by a Kerr-lens, mode-locked YVO ₄ /Nd:YVO ₄ laser coupled with an acousto-optic modulator	Hongwei Chu, Jia Zhao, Kejian Yang, Shengzhi Zhao, Tao Li, Dechun Li, Guiqiu Li, and Wenchao Qiao	260
Ray-optics model for optical force and torque on a spherical metal-coated Janus microparticle	Jing Liu, Chao Zhang, Yiwu Zong, Honglian Guo, and Zhi-Yuan Li	265
Faraday anomalous dispersion optical filter at ¹³³ Cs weak 459 nm transition	Xiaobo Xue, Duo Pan, Xiaogang Zhang, Bin Luo, Jingbiao Chen, and Hong Guo	275
High-Q silica microdisk optical resonators with large wedge angles on a silicon chip	Guanyu Li, Pei Liu, Xiaoshun Jiang, Chao Yang, Jiyang Ma, Hongya Wu, and Min Xiao	279
Deep-UV fluorescence lifetime imaging microscopy	Christiaan J. de Jong, Alireza Lajevardipour, Mindaugas Gecevičius, Martynas Beresna, Gediminas Gervinskas, Peter G. Kazansky, Yves Bellouard, Andrew H. A. Clayton, and Saulius Juodkazis	283
