

# PHOTONICS

## Research

Volume 6  
Number 4  
April 2018

Dispersive non-Hermitian optical  
heterostructures

O. V. Shramkova, K. G. Makris, A1  
D. N. Christodoulides, and  
G. P. Tsironis

Photon-pair generation in a quadratically  
nonlinear parity-time symmetric coupler

Diana A. Antonosyan, A6  
Alexander S. Solntsev, and  
Andrey A. Sukhorukov

Non-Hermitian lattices with a flat band and  
polynomial power increase [Invited]

Li Ge A10

Bistable lasing in parity-time symmetric  
coupled fiber rings

Sergey V. Smirnov, A18  
Maxim O. Makarenko,  
Sergey V. Suchkov,  
Dmitry Churkin, and  
Andrey A. Sukhorukov

Highly efficient generation of arbitrary vector  
beams with tunable polarization, phase, and  
amplitude

Sheng Liu, Shuxia Qi, 228  
Yi Zhang, Peng Li,  
Dongjing Wu, Lei Han, and  
Jianlin Zhao

X-ray absorption spectroscopy study of energy  
transport in foil targets heated by petawatt  
laser pulses

I. Y. Skobelev, S. N. Ryazantsev, 234  
D. D. Arich, P. S. Bratchenko,  
A. Y. Faenov, T. A. Pikuz,  
P. Durey, L. Doebl, D. Farley,  
C. D. Baird, K. L. Lancaster,  
C. D. Murphy, N. Booth,  
C. Spindloe, P. McKenna,  
S. B. Hansen, J. Colgan,  
R. Kodama, N. Woolsey, and  
S. A. Pikuz

(Contents continued)

Influences of multiphoton absorption and free-carrier effects on frequency-comb generation in normal dispersion silicon microresonators	Mulong Liu, Leiran Wang, Qibing Sun, Siqi Li, Zhiqiang Ge, Zhizhou Lu, Weiqiang Wang, Guoxi Wang, Wenfu Zhang, Xiaohong Hu, and Wei Zhao	238
Emerging photoluminescence from defective vanadium diselenide nanosheets	Amir Ghobadi, Turkan Gamze Ulusoy Ghobadi, Ali Kemal Okyay, and Ekmel Ozbay	244
Mid-infrared silicon photonic waveguides and devices [Invited]	Yi Zou, Swapnajit Chakravarty, Chi-Jui Chung, Xiaochuan Xu, and Ray T. Chen	254
Ultra-compact and broadband electro-absorption modulator using an epsilon-near-zero conductive oxide	Qian Gao, Erwen Li, and Alan X. Wang	277
Enhanced complete photonic bandgap in a moderate refractive index contrast chalcogenide-air system with connected-annular-rods photonic crystals	Jin Hou, Chunyong Yang, Xiaohang Li, Zhenzhou Cao, and Shaoping Chen	282
High-performance AlGaInP light-emitting diodes integrated on silicon through a superior quality germanium-on-insulator	Yue Wang, Bing Wang, Wardhana A. Sasangka, Shuyu Bao, Yiping Zhang, Hilmi Volkan Demir, Jurgen Michel, Kenneth Eng Kian Lee, Soon Fatt Yoon, Eugene A. Fitzgerald, Chuan Seng Tan, and Kwang Hong Lee	290
Clue to a thorough understanding of terahertz pulse generation by femtosecond laser filamentation	Jiayu Zhao, Weiwei Liu, Shichang Li, Dan Lu, Yizhu Zhang, Yan Peng, Yiming Zhu, and Songlin Zhuang	296
Graphitic carbon nitride, a saturable absorber material for the visible waveband	Mengxia Wang, Fukun Ma, Zhengping Wang, Dawei Hu, Xinguang Xu, and Xiaopeng Hao	307

(Contents continued)

High-quality 2- $\mu\text{m}$  Q-switched pulsed solid-state lasers using spin-coating-coreduction approach synthesized  $\text{Bi}_2\text{Te}_3$  topological insulators

*Junpeng Qiao, Shengzhi Zhao,  
Kejian Yang, Wei-Heng Song,  
Wenchao Qiao,  
Chung-Lung Wu, Jia Zhao,  
Guoqiu Li, Dechun Li, Tao Li,  
Hong Liu, and Chao-Kuei Lee*      314

1.3  $\mu\text{m}$  InAs/GaAs quantum dot lasers on silicon with GaInP upper cladding layers

*Jun Wang, Haiyang Hu,  
Haiying Yin, Yiming Bai,  
Jian Li, Xin Wei,  
Yuanyuan Liu,  
Yongqing Huang, Xiaomin Ren,  
and Huiyun Liu*      321

Noise-sidebands-free and ultra-low-RIN 1.5  $\mu\text{m}$  single-frequency fiber laser towards coherent optical detection

*Qilai Zhao, Zhitao Zhang,  
Bo Wu, Tianyi Tan,  
Changsheng Yang, Jiulin Gan,  
Huihui Cheng, Zhouming Feng,  
Mingying Peng,  
Zhongmin Yang, and  
Shanhui Xu*      326

Evanescence-wave pumped single-mode microcavity laser from fiber of 125  $\mu\text{m}$  diameter

*Yuchen Wang, Shu Hu,  
Xiao Yang, Ruizhi Wang,  
Heng Li, and  
Chuanxiang Sheng*      332

Broadening and enhancing 2.7  $\mu\text{m}$  emission spectra in Er/Ho co-doped oxyfluoride germanosilicate glass ceramics by imparting multiple local structures to rare earth ions

*Qunhuo Liu, Ying Tian,  
Wenhua Tang, Feifei Huang,  
Xufeng Jing, Junjie Zhang, and  
Shiqing Xu*      339

The color images are shown online.
