

PHOTONICS Research

Volume 6
Number 9
September 2018

| | | |
|--|---|-----|
| Self-Q-switched and wavelength-tunable tungsten disulfide-based passively Q-switched Er:Y ₂ O ₃ ceramic lasers | <i>Xiaofeng Guan, Jiawei Wang, Yuzhao Zhang, Bin Xu, Zhengqian Luo, Huiying Xu, Zhiping Cai, Xiaodong Xu, Jian Zhang, and Jun Xu</i> | 830 |
| Review of fast methods for point-based computer-generated holography [Invited] | <i>P. W. M. Tsang, T.-C. Poon, and Y. M. Wu</i> | 837 |
| Enhancing plasmonic trapping with a perfect radially polarized beam | <i>Xianyou Wang, Yuquan Zhang, Yanmeng Dai, Changjun Min, and Xiaocong Yuan</i> | 847 |
| Polarization-multiplexed, dual-comb all-fiber mode-locked laser | <i>Xin Zhao, Ting Li, Ya Liu, Qian Li, and Zheng Zheng</i> | 853 |
| Widely tunable 2.3 μm III-V-on-silicon Vernier lasers for broadband spectroscopic sensing | <i>Ruijun Wang, Stephan Sprengel, Anton Vasiliev, Gerhard Boehm, Joris Van Campenhout, Guy Lepage, Peter Verheyen, Roel Baets, Markus-Christian Amann, and Gunther Roelkens</i> | 858 |
| Room temperature optical mass sensor with an artificial molecular structure based on surface plasmon optomechanics | <i>Jian Liu and Ka-Di Zhu</i> | 867 |
| Solitons in the fractional Schrödinger equation with parity-time-symmetric lattice potential | <i>Xiankun Yao and Xueming Liu</i> | 875 |
| Tunable optical delay line based on integrated grating-assisted contradirectional couplers | <i>Xu Wang, Yuhe Zhao, Yunhong Ding, Sanshui Xiao, and Jianji Dong</i> | 880 |

(Contents continued)

| | | |
|--|---|-----|
| Dark dimer mode excitation and strong coupling with a nanorod dipole | <i>Yixiao Gao, Ning Zhou, Zhangxing Shi, Xin Guo, and Limin Tong</i> | 887 |
| Q-switched and mode-locked Er-doped fiber laser using PtSe ₂ as a saturable absorber | <i>Kang Zhang, Ming Feng, Yangyang Ren, Fang Liu, Xingshuo Chen, Jie Yang, Xiao-Qing Yan, Feng Song, and Jianguo Tian</i> | 893 |
| Antimonene: a long-term stable two-dimensional saturable absorption material under ambient conditions for the mid-infrared spectral region | <i>Hongyu Luo, Xiangling Tian, Ying Gao, Rongfei Wei, Jianfeng Li, Jianrong Qiu, and Yong Liu</i> | 900 |
| Modulation properties of solitary and optically injected phased-array semiconductor lasers | <i>Nianqiang Li, H. Susanto, B. R. Cemlyn, I. D. Henning, and M. J. Adams</i> | 908 |
| Irreversible denaturation of DNA: a method to precisely control the optical and thermo-optic properties of DNA thin solid films | <i>Hayoung Jeong, Paulson Bjorn, Seongjin Hong, Seunguk Cheon, and Kyunghwan Oh</i> | 918 |
| High-Q germanium optical nanocavity | <i>Ting-Hui Xiao, Ziqiang Zhao, Wen Zhou, Mitsuru Takenaka, Hon Ki Tsang, Zhenzhou Cheng, and Keisuke Goda</i> | 925 |
