News and Commentaries

- Seeing a ghost: hybrid waves in anisotropic crystals *Denis Baranov* 040501

Research Articles

- Class-specific differential detection in diffractive optical neural networks improves inference accuracy *Jingxi Li, Deniz Mengu, Yi Luo, Yair Rivenson, and Aydogan Ozcan* 046001
- Synchronization and temporal nonreciprocity of optical microresonators via spontaneous symmetry breaking *Da Xu, Zi-Zhao Han, Yu-Kun Lu, Qihuang Gong, Cheng-Wei Qiu, Gang Chen, and Yun-Feng Xiao* 046002
- Ghost resonance in anisotropic materials: negative refractive index and evanescent field enhancement in lossless media *Evguenii Narimanov* 046003
- Gap-type dark localized modes in a Bose-Einstein condensate with optical lattices *Liangwei Zeng and Jianhua Zeng* 046004
- Air-core fiber distribution of hybrid vector vortex-polarization entangled states [On the Cover] *Daniele Cozzolino, Emanuele Polino, Mauro Valeri, Gonzalo Carvacho, Davide Bacco, Nicolò Spagnolo, Leif K. Oxenløwe, and Fabio Sciarrino* 046005
